

Inter-M and MAJORCOM successful installation in **TOTAL Tower** in Paris

JULY 2019

MAJORCOM, the official distributor of Inter-M in France, have successfully equipped the TOTAL Tower in Paris La Défense with the Public Address 6000 8-Bus System along with AOE-212N and ARM-911A. The TOTAL Tower is an office skyscraper located in the business district of La Défense, in the city of Paris, France. It is the headquarters of the worldwide-known oil company TOTAL.

System

System

The system as a whole can handle more than 100 BGM broadcast zones and microphone call, an ARM-911A interconnected to the fire alarm allows the evacuation message.

This system's main rack consists of the Audio Matrix PX-6216, ECS-6216MS, switching units to manage the speaker lines connected to this rack locally.

Also, five slave racks that connected to the main rack are installed on different floors for the purpose of managing additional speaker lines and offering cost savings on cables and optimizing installation. A single cable connects between master and slaves to a proprietary protocol, and audio over IP is carried using the AOE-212N to route the audio from the main rack to the secondary rack.

The amplification is carried out using several Inter-M's class-D digital amplifiers (DPA Series), and finally, the wall-mounted loudspeakers allow a perfect and intelligible audio broadcasting.

Interview

For four decades, we have provided our partners with systems adapted to their actual technical and economic needs in Sound Systems (P.A, Voice Alarm, Commercial & Professional) and CCTV.

We are involved in the tertiary, institutional, and sports sectors and work with high-profile European brand names.

Through our partnership with prestigious brands such as INTER-M, you will find a line of products and systems that will answer all of your sound applications.

Request to customer

If you send us specific examples like French success stories, we would like to share it worldwide.

We plan to make a case study by monthly, and at the end of 2019, we will issue a reference book for construction company and consultant.

Please give a lot of feedback for us!
